| Cortisol                                      |                                      | As Reported | <0.2   | µg/dL  |
| Insulin                                       |                                      | As Reported | 5.01   | µIU/mL |
| Progesterone                                  |                                      | As Reported | <0.1   | ng/mL  |
| Testosterone                                  |                                      | As Reported | <0.01  | ng/mL  |
| T3  |                                      | As Reported | 156    | ng/dL  |
| T4  |                                      | As Reported | 13.4   | µg/dL  |

**Notes:**

For additional information on this Mediatech product, please contact our Technical Services department at (800) 492-1110 or via email at [scientificsupport@corning.com](mailto:scientificsupport@corning.com).

This product was tested in accordance with Mediatech, Inc. specifications and procedures current as of date of manufacture. Testing procedures are maintained in compliance with the current versions of the USP and/or EP, where applicable.

Cell lines used in MTT Assay: 3T3, L929, MDCK and Vero. Cell lines used in 9CFR Part 113.53c virus testing: MDBK and Vero.

For research or further manufacturing uses only. Not for use as an excipient. Not for therapeutic or diagnostic uses. Not for human or animal consumption. Utilization of this product apart from the labeled intended use may be a violation of local and/or Federal Law.

Product meets European Union requirements for the production of technical blood products.

Product meets export certification requirements for Fetal Bovine Serum to Korea.

**Origin and BSE/TSE Statements:**

The aforementioned lot was manufactured from fetal bovine blood collected from government approved harvest facilities located in the United States, a country recognized by the United States Department of Agriculture - Animal and Plant Health Inspection Service (USDA-APHIS) and the World Organization for Animal Health (OIE) as having a negligible risk of Bovine Spongiform Encephalopathy (BSE), a bovine-specific Transmissible Spongiform Encephalopathy (TSE). All fetal bovine serum is derived from fetuses collected from healthy bovine cows and heifers that have passed ante and post mortem inspection and were found free of contagious diseases.

The following signatures indicate the above material has met all quality specifications and has been reviewed by a Quality representative.
